About This Game

The robots you design will change the world! Will you show them the true meaning of love, or conquer Alaska with your robot army?

Choice of Robots is an epic 300,000-word interactive sci-fi novel by Kevin Gold, where your choices control the story. It's entirely text-based—without graphics or sound effects—and fueled by the vast, unstoppable power of your imagination.

- Build a unique robot character—you choose everything from its shape to what it calls you
- Instigate or prevent a robotic uprising
- Teach your robots to love humanity, or disdain it
- Build an artificial intelligence suitable to take control of the world's governments
- Start a war against the United States, and win
- Marry a human or an advanced robot, and start a family

Play out thirty years of your life as a brilliant robot maker, from graduate school near the present day to a future in which your

robots have changed everything. Depending on your choices, your robots may be independent or obedient, clumsy or graceful, empathic or cold...and you yourself may live to an old age happily married or alone with only robots to comfort you.

Play as male or female, gay or straight, with nine characters to romance, four alternate climax chapters, and over seventy achievements to unlock.

The screenshot displays a music application interface with a list of songs. The selected song, 'Oh Love' by Green Day, is highlighted in blue and shows a progress of 79.2%. Other songs in the list include 'Number Thirteen' by Red Fang, 'The Number of the Beast' by Iron Maiden, 'Outshined' by Soundgarden, 'Oye Como Va' by Santana, 'Painkiller' by Judas Priest, 'Paint It, Black' by The Rolling Stones, 'Panic Switch' by Silversun Pickups, and 'Paralyzer' by Finger Eleven. The interface includes a sidebar with album covers, a main list area, and a bottom navigation bar with buttons for 'Sort', 'My Path', 'Tools', 'Favorite', 'Back', and 'Select'. A large 'SELECT A SONG' prompt is overlaid on the bottom right.

I would recommend this game to anyone who likes to kill zombies and to people that likes playing Co-op with there friends.

I wouldn't recommend online Co-op, the majority of players you'll play with are pretty toxic and sh*tty people in general. L4D2's netcode is about on par with TF2's netcode, it's Garbage. So I would say stay away from online Co-op, except for Versus Mode pretty good.

Overall: It's a pretty decent game. I would say the game is a bit Overrated and can get really repetitive, but for it's time it did something unique for the Zombie Genre. So I guess it deserves some kind of praise.

Edit: Comments on this review that were typed by Edgy Teenagers and 9 year olds seem to not like Different Opinions about a game that has problems. So I hope you like Disable Comments L4D fanboys. lol. The game desperately needs an option to shrink it into a window and an option to lower the resolution. Everything was too laggy to enjoy.. Step 1: buy this great game with amaizing interface

Step 2: get your friends to your house

Step 3: get drunk playing this game with them

Step 4: profit from friendship

Might need to find me some friends. If you like craps or have a passing interest, then I'd recommend this game. The game is fully functional and enjoyable. The developers are also active and responsive and this is only the beginning.. Do you love old RPG games? Well, this one will do.

What I love the most: The developer is active and updates are flowing like a river. (bug fixes, etc)

Buy this game. You won't regret :)

Just doesn't work DO NOT BUY. Very generic tower defense game with very limited tower options, and no real upgrade depth at all.

Only both with this if you have already cleared out the long list of much better games including both Defense Grids, Sol Survivor and Kingdom Rush.

Even most lazy mobile ports have more depth than this.. I'd classify this as an "inverse tower defence game". Walk in a door, it seals behind you and the game spawns in a bunch of turrets. You have to destroy all the turrets in the room to open the doors and repeat in the next room. FPS bullet hell vs static defenses. Conceptually fun, but after five or ten rooms of repetition, I was completely over it. Feels like a series of static "danger rooms".

Having some mobile enemies would really help.. This game delivers. It truly scratches that itch for a vegetable themed rocket league. At first I thought the other reviews might have been posted by the dev's family, but the character's background is indeed very well developed and engaging. The matchmaking seems on point, too bad I could not really test it, since there was no other vegetables to play with :(

10/10 would try tossing that salad again.

Last but not least, that Major League Carrot logo is a true beauty. Can I use it for my twitch channel ?

- Carotte Mendoza. The second CYOA by Kevin Gold, it has less broadside choices than Choice of Robots and is more story-focused with deeper characters.

Damn, I can't find anything else to say. This guy just produces perfectly balanced works and finely written words there is just no so much to say except go for it and read it if you like wizard focused story with different branches of magic and some church related storyline.

The ending felt satisfying and the development of the main character goes through different stages and chapters and each one is interesting. No obvious flaws here. So that's it. Some smart writing yet again by Kevin Gold even though the genre is completely different than Choice of Robots. Bravo. This author is really someone to follow.
